The programme will examine the challenges facing the Australian and British infrastructure sectors in the post-pandemic era.

We will share insights into each countries' investment in infrastructure, jobs, technology and new ways of working. How we are seeking to deliver redesigned, resilient cities and transport systems, whilst balancing consumer expectations on the effect of climate change and the new needs of the population.

The programme will bring together the Australian and British infrastructure sectors including infrastructure experts, financiers, government and major project proponents, to share knowledge, best practice and foster collaboration with their international counterparts.
